**ALL IN**  
BioPoint  
Technology

**BIOPOINT SUPERIOR  
HERBAL TECHNOLOGY**

Constant level of active ingredients

High product activity through the shelf life

Constant activity along the drinking line

Less susceptibility to external factors

Nothing unnecessary - just active ingredients

Low dosage – high efficacy

# Beeodine & Beeodine SOFT

## For intestinal antiseptic

BEEODINE/BEEODINE SOFT is balanced compositions for prevention honeybee from the viral, fungal, bactericidal diseases and nosemosis. Therefore provides minimum interference from the weather changes and increases the brood efficiency.

BEEODINE/BEEODINE SOFT's active substance is a good intestinal antiseptic. Herbal extracts in the composition supports the active substance's effectiveness. Vitamin A is repair damaged tissues, increases in cellular immunity, decreases prevalence of infection and decreases mortality rate.

### INDICATIONS:

- Increases honey production
- Increases the brood efficiency
- Increases honeycomb knitting
- Prevention of the disorders resulting from fungus, bacteria and nosema disease
- Intestinal antiseptic
- Decreases honeybee deaths

### COMPOSITION (In 1 L):

Iodine (E2), Vitamin A (E672), Cinnamaldehyde, Tea tree oil, Elecampane extract, Pine oil and Propylene glycol.

### DOSAGE:

BEEODINE; 0.2 ml is added to 0.5-1 liter 1/1 sugar syrup 5 times or 1 ml 1 kg honey-sugar candy.

BEEODINE SOFT; 1 ml is added to 0.5-1 liter 1/1 sugar syrup 5 times or 5 ml 1 kg honey-sugar candy.

### WITHDRAWAL PERIOD:

Not applicable.

### PACKAGE:

250 ml, 500 ml and 1 L.

# BEETONIC

## For full range of amino acids

BEETONIC contains all amino acids necessary for honeybees. Amino acids increase royal jelly production. Royal jelly is natural antibacterial and antifungal. BEETONIC influences the improvement of all metabolic processes occurring in the organism and this way improves parameters of resistance against diseases, increases the condition of brood and adult bees and increases the productivity of bee colonies, decreasing mortality rate.

### INDICATIONS:

- Stimulate the queen for egg laying
- Increases the production of royal jelly
- Decreases honeybee deaths

### COMPOSITION (In 1 L):

Choline chloride, Methionine, Lysine, Leucine, Isoleucine, Alanine, Arginine, Aspartic acid, Glutamic acid, Glycine, Histidine, Phenylalanine, Proline, Serine, Threonine, Tyrosine and Valine.

### DOSAGE:

It is used as 5 ml for 0.5-1 liter 1/1 sugar syrup and 1 kg honey-sugar candy during the time of feeding bees.

### WITHDRAWAL PERIOD:

Not applicable.

### PACKAGE:

250 ml, 500 ml and 1 L.

# IMMUNBEE

## For stimulates immunity

IMMUNBEE is balanced compositions for stimulate the immune system. Immune system is very important for the body resistance bacterial, viral against illness and damages from varroa. Zinc is an essential mineral involved in the production of certain immune cells. Vitamin C acts as an antioxidant. Antioxidants help fight free radicals, a type of unstable molecule known to damage the immune system. There's some evidence that vitamin C may be particularly helpful in boosting the immune systems of honeybee under major stress. Also vitamin C is necessary for tissue regeneration. Herbal oils ensure the increase in body strength against infections.

### INDICATIONS:

- Stimulate the immune system
- Support the healing of damaged tissues in body after varroa treatment and diseases treatment
- Ensure the increases in body strength against infections
- Decreases honeybee deaths

### COMPOSITION (In 1 L):

Zinc (E6), Vitamin C (E300), Elderberry extract and Echinacea extract.

### DOSAGE:

It is used as 2.5-5 ml is added to 0.5-1 liter 1/1 sugar syrup or 1 kg honey-sugar candy.

### WITHDRAWAL PERIOD:

Not applicable.

### PACKAGE:

250 ml, 500 ml and 1 L.

# NOSEMBEE PLUS

## For prevention and treatment of nosema disease

NOSEMBEE PLUS is balanced compositions for treatment and prevention honeybee from nosemosis. NOSEMBEE PLUS's active substance has sporocidal effect for *Nosema apis* and *N. ceranae*. B complex vitamins are essential for the honeybees normal continuation of their life functions, their productivity and gaining resistance against diseases.

### INDICATIONS:

- For prevention and treatment of nosema disease
- Decreases honeybee deaths

### COMPOSITION (In 1 L):

Methyl salicylate, Vitamin B1, Vitamin B2 and Vitamin B6.

### DOSAGE:

#### For treatment:

Totally 40 ml is applied per hive.

10 ml Nosembee Plus per hive with 0.5-1 L 1/1 syrup and it is applied four times

20 ml Nosembee Plus per hive with 1 Kg honey-sugar candy and it is applied two times

#### For prevention:

Totally 20 ml is applied per hive.

10 ml Nosembee Plus per hive with 0.5-1 L 1/1 syrup and it is applied two times

20 ml Nosembee Plus per hive with 1 Kg honey-sugar candy and it is applied once.

### WITHDRAWAL PERIOD:

Not applicable.

### PACKAGE:

250 ml, 500 ml and 1 L.

# VARBEE PLUS

## For prevention of varroa

VARBEE PLUS is balanced compositions for prevention honeybee from varroosis and for stimulate the immune system. VARBEE PLUS's active substance has varroacid effect for *Varroa jacobsoni*. Immune system is very important for the body resistance bacterial, viral against illness and damages from varroa. Zinc is an essential mineral involved in the production of certain immune cells. Selenium, Vitamin C and Vitamin E acts as an antioxidant. Antioxidants help fight free radicals, a type of unstable molecule known to damage the immune system. They have helpful in boosting the immune systems of honeybee under major stress. Also vitamin C is necessary for tissue regeneration. B complex vitamins are essential for the honeybees normal continuation of their life functions, their productivity and gaining resistance against diseases.

### INDICATIONS:

- For prevention of varroa
- Stimulate the immune system
- Support the healing of damaged tissues in body after varroa treatment and diseases treatment
- Ensure the increases in body strength against infections
- Decreases honeybee deaths

### COMPOSITION (In 1 Kg):

Vitamin E (3a700), Vitamin C (E300), Vitamin B1, Vitamin B2, Vitamin B6, Zinc (E6), Selenium (E8), Equisetum arvense L. tincture and Cichorium intybus L. extract.

### DOSAGE:

10 g Varbee Plus for 1-5 frames with 500 g honey-sugar candy  
20 g Varbee Plus for 6-10 frames with 1 kg honey-sugar candy

### WITHDRAWAL PERIOD:

Not applicable.

### PACKAGE:

500 g and 1Kg.

# VITAFBEE GOLD\*

## For prevention and treatment of foulbrood diseases

VITAFBEE GOLD is balanced compositions for prevention and treatment honeybee from foulbrood diseases and for stimulate the immune system. VITAFBEE GOLD's active substance has bactericidal effect for foulbrood diseases agent. Immune system is very important for the body resistance bacterial and viral against illness. Zinc is an essential mineral involved in the production of certain immune cells. Selenium, Vitamin C and Vitamin E acts as an antioxidant. Antioxidants help fight free radicals, a type of unstable molecule known to damage the immune system. They have helpful in boosting the immune systems of honeybee under major stress. Also vitamin C is necessary for tissue regeneration. B complex vitamins are essential for the honeybees normal continuation of their life functions, their productivity and gaining resistance against diseases. Vitamin A repair damaged tissues, increases in cellular immunity and decreases mortality rate. Also Vitamin E and selenium increases royal jelly production. Royal jelly is natural antibacterial and antifungal.

### INDICATIONS:

- For prevention and treatment of foulbrood diseases
- Stimulate the immune system
- Ensure the increases in body strength against infections
- Has an antimicrobial and antifungal effect
- Increases productivity and resistance bacterial diseases
- Stimulate the queen for egg laying
- Increases the production of royal jelly
- Decreases honeybee deaths

### COMPOSITION (In 1 L):

Vitamin E (3a700), Vitamin C (E300), Vitamin B1, Vitamin B2, Vitamin B6, Zinc (E6), Selenium (E8), Eugenol, Cinnamaldehyde and Propylene glycol.

### DOSAGE:

It is used as 2.5-5 ml is added to 0.5-1 liter 1/1 sugar syrup or 1 kg honey-sugar candy and it is applied 3-5 times.

### WITHDRAWAL PERIOD:

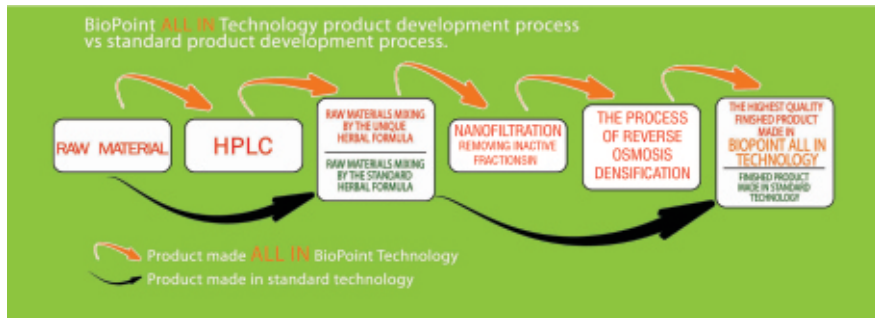

Not applicable.

### PACKAGE:

250 ml, 500 ml and 1 L.

\*VITAFBEE GOLD is producing with Institute of Industrial Organic Chemistry (IPO)'s license.

**BioHAYAT** has been endeavored since 2005 in Turkish beekeeping market. We have good network in the market. We have being launched new conception to classical chemical companies supplier partnership understandings, because We are not only a generic company proposing desirable solution but also innovate creative ideas. We are creating unique tools and programs to help our customers to provide the best possible care. BioHAYAT team mission is to establish long-term business relation with mutually profit. We collaborate with universities to share technologies and ideas, in order to introduce new products to the market efficiently. A considerable part our revenue we devote to research and find new solutions for beekeepers. We have product development agreements with the Biopoint, Institute of Industrial Organic Chemistry (IPO), University of Warmia and Mazury and University of Hacettepe.

**BioPoint** is a leading Polish manufacturer of feed additives. Our strong market position has been gradually built through the years, mainly through cooperation with specialists of animal diseases and scientific research centers. In 2011 BioPoint made a significant milestone production process. An innovative manufacturing technology process of herbal products was developed. BioPoint ALL IN Technology allows for a maximum product concentration because of Reverse Osmosis process. It means that a dosage of selected BioPoint products is lower, more competitive and overall treatment cheaper than the other one. At the same time our products maintain high efficiency. ALL IN Technology also ensures greater stability of products and a longer shelf life. It means that once opened product maintains its properties throughout the whole period of use. It is very important when you stock opened products for many months and you want to be certain that its activity is still the same. All BioPoint products are made in the factory in accordance with GMP standards. The highest business standards as performed by BioPoint as well as our involvement in continuous development are confirmed in received certificates: ISO 9001:2009 and Reliable Company. Since 2009 we also participate in competitions Fair Play - we won prizes at both editions completed so far! (Fair Play Enterprise 2009 and Fair Play Enterprise 2010).
